

Grading points	Self Assessment score = 67	Evidence
Video	3	Video even though proposes most of the details of product but it doesn't provide enough information about installing and integration with telegram.
Workload is spread over the whole team	3	Github repository is the evidence that all members contributed in developing features equally, https://github.com/shubham-wawale/Recipe_Recommender/commits/master This link provides all the commits by the team.
Number of commits	3	Github commits on the "main" branch https://github.com/shubham-wawale/Recipe_Recommender/commits/master
Number of commits: by different people	3	Can be viewed on github repository: https://github.com/shubham-wawale/Recipe_Recommender/commits/master , can also check commits on different branch
Issues reports: there are many	2	Not many issues as we discussed most of the issues prior to start developing https://github.com/shubham-wawale/Recipe_Recommender/issues?q=is%3Aopen+is%3Aissue
Issues are being closed	2	Out of four issues, two issues are closed https://github.com/shubham-wawale/Recipe_Recommender/issues?q=is%3Aissue+is%3Aclosed
DOI badge: exists	3	https://zenodo.org/records/10023535
Docs: doco generated, format not ugly	3	https://github.com/shubham-wawale/Recipe_Recommender/tree/master/docs Changes.md file also provides information about our teams contribution
Docs: what: point descriptions of each class/function (in isolation)	3	https://github.com/deekay2310/MyDollarBot/blob/main/docs/functionDescription.md
Docs: how: for common use cases X,Y,Z mini-tutorials showing worked examples on how to do X,Y,Z	2	Some use cases are provided in demo video
Docs: why: docs tell a story, motivate the whole thing, deliver a punchline that makes you want to rush out and use the thing	2	
Docs: short video, animated, hosted on your repo. That convinces people why they want to work on your code.	3	
Use of version control tools	3	https://github.com/shubham-wawale/Recipe_Recommender/tree/master/docs Used branches to isolate the development of each feature
Use of style checkers	1	https://github.com/shubham-wawale/Recipe_Recommender/actions/workflows/Style_Checker_and_Prettify_Code.yml We inherited style checkers from original repository, but on our repo it is failing
Use of code formatters.	3	https://github.com/shubham-wawale/Recipe_Recommender/actions/workflows/Code_Formatter_and_Syntax_Check.yml Code formatter badge on repository shows that code formatter status as "Passing"
Use of syntax checkers.	3	https://github.com/shubham-wawale/Recipe_Recommender/actions/workflows/Code_Formatter_and_Syntax_Check.yml Syntax checker badge on repository shows that syntax checker status as "Passing"
Use of code coverage	3	https://app.codecov.io/gh/sak007/MyDollarBot-BOTGo
Other automated analysis tools	1	https://github.com/shubham-wawale/Recipe_Recommender/actions/workflows/coverage.yml We inherited code coverage from original repository, but on our repo it is failing
Test cases exist	3	https://github.com/shubham-wawale/Recipe_Recommender/tree/master/test
Test cases are routinely executed	2	
The files CONTRIBUTING.md lists coding standards and lots of tips on how to extend the system without screwing things up	3	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/CONTRIBUTING.md
Issues are discussed before they are closed	2	https://github.com/shubham-wawale/Recipe_Recommender/issues?q=is%3Aissue+is%3Aclosed Since we met physically to develop the project, issues were not discussed over repository
Chat channel: exists	1	No, physical meets were preferred
Test cases: a large proportion of the issues related to handling failing cases.	1	
Evidence that the whole team is using the same tools: everyone can get to all tools and files	3	https://github.com/shubham-wawale/Recipe_Recommender Everone is contributor to repository and each team member has complete access to repository tools and files
Evidence that the members of the team are working across multiple places in the code base	3	https://github.com/shubham-wawale/Recipe_Recommender/commits/master
Short release cycles	3	Frequent commits https://github.com/shubham-wawale/Recipe_Recommender/commits/master
Question 1.1: Does your website and documentation provide a clear, high-level overview of your software?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/README.md

Question 1.2: Does your website and documentation clearly describe the type of user who should use your software?	No	
Question 1.3: Do you publish case studies to show how your software has been used by yourself and others?	No	
Question 2.1: Is the name of your project/software unique?	No	Found similar name projects on github
Question 2.2: Is your project/software name free from trademark violations?	Yes	Yes, didn't find any details about trademark violation in original repository https://github.com/het-patel99/Recipe_Recommender
Question 3.1: Is your software available as a package that can be deployed without building it?	No	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/README.md README file provides all the information about installing and building and nowhere it is mentioned about project available as package
Question 3.2: Is your software available for free?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/LICENSE License file states all the necessary details about utilizing and further using our project
Question 3.3: Is your source code publicly available to download, either as a downloadable bundle or via access to a source code repository?	Yes	https://github.com/shubham-wawale/Recipe_Recommender Repository is public and can be downloaded from github
Question 3.4: Is your software hosted in an established, third-party repository like GitHub, BitBucket, LaunchPad or SourceForge?	No	Original project we inherited was hosted but we didn't do it
Question 4.1: Is your documentation clearly available on your website or within your software?	Yes	Docs folder of repository contains complete documentation https://github.com/shubham-wawale/Recipe_Recommender/tree/master/docs
Question 4.2: Does your documentation include a "quick start" guide, that provides a short overview of how to use your software with some basic examples of use?	yes	README file contains a demo video https://github.com/shubham-wawale/Recipe_Recommender/blob/master/README.md
Question 4.3: If you provide more extensive documentation, does this provide clear, step-by-step instructions on how to deploy and use your software?	Yes	README file all the instruction from downloading, installing dependencies and running the project https://github.com/shubham-wawale/Recipe_Recommender/blob/master/README.md
Question 4.4: Do you provide a comprehensive guide to all your software's commands, functions and options?	Yes	Yes, docs folder of repository contains file regarding the same https://github.com/shubham-wawale/Recipe_Recommender/tree/master/docs
Question 4.5: Do you provide troubleshooting information that describes the symptoms and step-by-step solutions for problems and error messages?	No	
Question 4.6: If your software can be used as a library, package or service by other software, do you provide comprehensive API documentation?	No	
Question 4.7: Do you store your documentation under revision control with your source code?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/tree/master/docs
Question 4.8: Do you publish your release history e.g. release data, version numbers, key features of each release etc. on your web site or in your documentation?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/releases/tag/1.0.0 We provide project version releases on the github
Question 5.1: Does your software describe how a user can get help with using your software?	No	
Question 5.2: Does your website and documentation describe what support, if any, you provide to users and developers?	No	
Question 5.3: Does your project have an e-mail address or forum that is solely for supporting users?	No	
Question 5.4: Are e-mails to your support e-mail address received by more than one person?	No	
Question 5.5: Does your project have a ticketing system to manage bug reports and feature requests?	No	
Question 5.6: Is your project's ticketing system publicly visible to your users, so they can view bug reports and feature requests?	No	
Question 6.1: Is your software's architecture and design modular?	Yes	
Question 6.2: Does your software use an accepted coding standard or convention?	Yes	
Question 7.1: Does your software allow data to be imported and exported using open data formats?	Yes	Data is imported either using csv files to upload to database directly but if data is imported via using frontend of project it is done via json format https://github.com/shubham-wawale/Recipe_Recommender/tree/master/Data
Question 7.2: Does your software allow communications using open communications protocols?	Yes	Communication of frontend and backend is using http protocol which is open communication protocol.
Question 8.1: Is your software cross-platform compatible?	Yes	Frontend can be accessed from any browser, backend needs to run on specific server
Question 9.1: Does your software adhere to appropriate accessibility conventions or standards?	Yes	
Question 9.2: Does your documentation adhere to appropriate accessibility conventions or standards?	Yes	
Question 10.1: Is your source code stored in a repository under revision control?	Yes	Source code is stored in GitHub, a version control software https://github.com/shubham-wawale/Recipe_Recommender
Question 10.2: Is each source code release a snapshot of the repository?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/tree/1.0.0 Release 1.0.0 is the snapshot of the original repo
Question 10.3: Are releases tagged in the repository?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/tags Provides tags to each release
Question 10.4: Is there a branch of the repository that is always stable?	Yes	https://github.com/shubham-wawale/Recipe_Recommender Master branch is always stable
Question 10.5: Do you back-up your repository?	No	

Question 11.1: Do you provide publicly-available instructions for building your software from the source code?	Yes	README file contains all installation and building instruction https://github.com/shubham-wawale/Recipe_Recommender/blob/master/README.md
Question 11.2: Can you build, or package, your software using an automated tool?	No	User needs to manually execute command in terminal to build and run project
Question 11.3: Do you provide publicly-available instructions for deploying your software?	No	
Question 11.4: Does your documentation list all third-party dependencies?	Yes	Frontend and backend both have third party dependencies, package.json file provides in each frontend and backend folder provides information about them
Question 11.5: Does your documentation list the version number for all third-party dependencies?	Yes	package.json file provides in each frontend and backend folder provides information about them
Question 11.6: Does your software list the web address, and licences for all third-party dependencies and say whether the dependencies are mandatory or optional?	No	
Question 11.7: Can you download dependencies using a dependency management tool or package manager?	Yes	Using npm user can install dependencies. README provides dependency installation instruction. https://github.com/shubham-wawale/Recipe_Recommender/blob/master/README.md
Question 11.8: Do you have tests that can be run after your software has been built or deployed to show whether the build or deployment has been successful?	Yes	Test folder contains all such tests. https://github.com/shubham-wawale/Recipe_Recommender/tree/master/test
Question 12.1: Do you have an automated test suite for your software?	Yes	
Question 12.2: Do you have a framework to periodically (e.g. nightly) run your tests on the latest version of the source code?	No	
Question 12.3: Do you use continuous integration, automatically running tests whenever changes are made to your source code?	Yes	
Question 12.4: Are your test results publicly visible?	No	
Question 12.5: Are all manually-run tests documented?	No	
Question 13.1: Does your project have resources that are regularly updated with information about your software?	No	
Question 13.2: Does your website state how many projects and users are associated with your project?	Yes	README has information about contributors and forked repository information can be found on repository
Question 13.3: Do you provide success stories on your website?	No	
Question 13.4: Do you list your important partners and collaborators on your website?	No	Mentioned on Repository
Question 13.5: Do you list your project's publications on your website or link to a resource where these are available?	No	
Question 13.6: Do you list third-party publications that refer to your software on your website or link to a resource where these are available?	No	
Question 13.7: Can users subscribe to notifications to changes to your source code repository?	No	
Question 13.8: If your software is developed as an open source project, do you have a governance model?	No	
Question 14.1: Do you accept contributions (e.g. bug fixes, enhancements, documentation updates, tutorials) from people who are not part of your project?	Yes	Its a open repository, contribution are welcomed under the standards mentioned in CONTRIBUTING file https://github.com/shubham-wawale/Recipe_Recommender/blob/master/CONTRIBUTING.md
Question 14.2: Do you have a contributions policy?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/CONTRIBUTING.md
Question 14.3: Is your contributions' policy publicly available?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/CONTRIBUTING.md
Question 14.4: Do contributors keep the copyright/IP of their contributions?	No	
Question 15.1: Does your website and documentation clearly state the copyright owners of your software and documentation?	No	
Question 15.2: Does each of your source code files include a copyright statement?	No	
Question 15.3: Does your website and documentation clearly state the licence of your software?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/LICENSE
Question 15.4: Is your software released under an open source licence?	Yes	MIT license. https://github.com/shubham-wawale/Recipe_Recommender/blob/master/LICENSE
Question 15.5: Is your software released under an OSI-approved open-source licence?	Yes	https://github.com/shubham-wawale/Recipe_Recommender/blob/master/LICENSE
Question 15.6: Does each of your source code files include a licence header	No	
Question 15.7: Do you have a recommended citation for your software?	Yes	https://zenodo.org/records/10023535
Question 16.1: Does your website or documentation include a project roadmap (a list of project and development milestones for the next 3, 6 and 12 months)?	No	
Question 16.2: Does your website or documentation describe how your project is funded, and the period over which funding is guaranteed?	No	
Question 16.3: Do you make timely announcements of the deprecation of components, APIs, etc.?	No
